Inwood Energy Storage Project

Project overview

RES is proposing the Inwood Energy Storage Project to provide reliability services that support Ontario's growing electricity demand. The project will store electricity during off-peak periods and supply it back to the grid when demand is highest.

Located west of Inwood in the Enniskillen Township, Southwest Ontario, the facility would have a capacity of up to 240MW.

Community benefits

The project is expected to deliver the following local and provincial benefits:

-  **Economic boost:** Attract significant new investment into Southwest Ontario.
-  **Local jobs & investment:** Up to 250 new construction jobs and estimated 10 long-term operations jobs.
-  **Grid reliability:** Deliver up to 240MW of new, flexible capacity to stabilize supply during peak demand, reduce outages, and ensure reliable power.
-  **Affordable energy:** Enough to power nearly 72,000 households.
-  **Indigenous participation:** Indigenous partnership and ownership with local First Nations.
-  **Support for landholders:** Fair agreements and new income opportunities.
-  **Community Benefit Fund:** Co-designed by stakeholders, to provide direct and targeted benefits.

Our engagement commitment

We believe in early, transparent, and ongoing dialogue with communities. Our principles:

- Listening first** – your feedback will help shape decisions.
- Transparency** – sharing clear, timely updates at all stages.
- Respect** – addressing noise, traffic, and safety concerns.
- Fairness** – ensuring benefits are shared locally.

Looking ahead

- From 2025 – Development, pre-consultation with council staff
- August 2025 – Community and Indigenous stakeholder engagement
- October 2025 – Council delegation
- November 2025 – Public open house
- December 2025 – IESO proposal submission
- June 2026 – IESO contract award
- 2027 – Development applications, planning approvals, interconnection and permitting
- 2028 – Construction begins
- 2029 – Anticipated commercial operations

Next steps

This is your community and your voice matters.
